

Book Now/Inquiry form from Owner Rez

Adding your booking/inquiry widget to your listing allows guests to book with you directly using your Owner Rez software and allows you better tracking of your \$99 investment.

If you use Owner Rez, we highly recommend you add the booking/inquiry widget (if it was there before, you'll have to add it again).

Here is how to add widgets:

Log into Owner Rez and click Settings: Widgets. Create a booking/inquiry widget.

Once you create the widget, **click the copy button** under "Embed Code."

Generate Code

For Property Edgewater Sand Dollar Villa ▾

If you choose "All Properties", the generated code will detect the correct property based on the URL of the page where it is hosted.

Embed Code

Copy/paste this code into your website where you want the booking/inquiry widget to appear: Copy

```
<!-- OwnerRez Booking/Inquiry widget for Edgewater Sand Dollar Villa -->
<div class="ownerrez-widget" data-widgetId="bf6e054236f441c99110381c7a67074c" data-propertyId="be0aec302dc5469b82f5730ea7654b4c" data-widget-type="Booking/Inquiry"></div>
<script type="text/javascript" src="https://secure.ownerreservations.com/widget.js"></script>
```

Next, log into PCBRBO.com, go to My Listings, and **click the edit icon** for that property,

On the **Description** page, paste the code from Owner Rez into the Owner Rez Booking/Inquiry widget box. Save.

The next improvement is to add the **Owner Rez calendar availability widget**. For steps to complete that, scroll down...

Adding the Availability/Nightly Rates Calendar

Go back to Owner Rez and the Settings: Widget page. Create a widget for a multiple month calendar.

You can determine how many months to show, what color to use to show unavailability, and you can elect to show the daily rates (which I recommend doing so you do not need to fill in the custom rates on the PCBRBO listing).

Follow the same steps of **copying the Embed code**, then go to the Calendar page of the listing set up, and paste that code into the calendar widget section:

Today Dates Booked

Paste in your Owner Rez Calendar Widget OR utilize iCalendar feeds below

```

If you are using the Owner Rez widget, you **do not** need to populate the iCal feed boxes.

Once you save, confirm this was done correctly by clicking on your listing to see how the booking form appears on the top right side and the availability calendar appears below it.
